All educational sessions and meal functions will be held at:
Cincinnati Airport Marriott, 2395 Progress Drive
Hebron, KY | Phone (859) 586-0166

Special Services
If you require special assistance to attend this event, please call Betsy Jacobs at (859) 257-5320

Cancellation Policy
UK HealthCare CECentral reserves the right to cancel or make substitutions to this activity.

Accreditation
The University of Kentucky, College of Nursing is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center’s Commission on Accreditation (ANCC).
This educational activity is offered for a maximum of 3.5 ANCC contact hours.
The Kentucky Board of Nursing (KBN) approves The University of Kentucky, College of Nursing (UKCON) as a provider as well. ANCC and KBN approval of a continuing nursing education provider does not constitute endorsement of program content nor commercial sponsorship. This educational activity is offered for a maximum of 4.2 KBN contact hours. Provider # 3-0008-01-18-792. In order to receive credit, participants will complete the CNE activity, complete the evaluation form, certificates may be printed once the evaluation is completed.

Acknowledgement
This activity is provided by the Kentucky Injury Prevention and Research Center, University of Kentucky College of Public Health, the Kentucky Office of Drug Control Policy, and St. Elizabeth Healthcare.

Tackling the Opioid Epidemic: A Nursing Perspective
SATURDAY
April 30, 2016
Cincinnati Airport Marriott
2395 PROGRESS DRIVE | HEBRON, KENTUCKY
For advanced practice nurse practitioners and all nurses caring for patients with or the potential to develop substance use disorders.
Tackling the Opioid Epidemic: A Nursing Perspective

Overview

Drug overdose is a huge problem facing the health care system in Kentucky. Drug overdose deaths are acute poisonings due to prescription or illicit drugs. According to data from the National Center for Health Statistics, Kentucky had the second highest drug overdose death rate in the U.S. in 2013.

Nurses encounter patients seeking prescription or illicit drugs in all work settings and routinely provide 24-hour care to patients in hospitals. The staff nurse role is typically filled at the bedside where nurses are in frequent contact with patients seeking health care who use illicit drugs (Natan, Belay, & Neta, 2009) and face complex clinical and personal situations that require a high level of clinical competence, expertise, and skill (Ford, Banmer, & Becker, 2009). Advanced Practice Nurse Practitioners are concerned about prescribing opioids because of the problems with addiction and regulatory oversight. When asked to rank barriers to opioid prescribing, the NPs rated cost as the number one barrier and regulatory oversight and addiction as the second barrier – http://nurse-practitioners-and-physician-assistants.advanceweb.com/.

The learner outcome for this activity is that nurses will use KASPER in the care and treatment of patients with substance use disorders.

Objectives

Upon completion of this educational activity, participants will be able to:
1. Discuss considerations for women who have substance use problems
2. Review Kentucky laws affecting prescribers and nurses in general
3. Apply best practices for accurate dosing and discontinuation of opioids
4. Describe the care of patients with pain in both acute and primary care settings

The learner outcome for this activity is that nurses will use KASPER in the care and treatment of patients with substance use disorders.

Agenda

Attendees will receive a detailed agenda at meeting check-in.

7:00 – 8:00 am Registration and Continental Breakfast
8:00 – 8:15 am Welcome and Introductions
8:15 – 9:00 am KEYNOTE ADDRESS – Treating Women with Opioid Use Disorders: A Focus on Pregnant and Parenting Women
9:00 – 9:15 am Brain Break
9:15 – 10:45 am Laws and Regulations Applicable to APRN Prescribing of Controlled Substances
10:45 – 11:15 am Best Practice Nursing Care for Patients With Substance Abuse in Acute Care
11:15 am – 12:00 pm Chronic Opiate Analgesic Therapy (COAT) in a Primary Care Outpatient Clinic: Patient Perspective on Quality Treatment
12:00 – 12:15 pm Evaluation, Closing Remarks, and Adjournment

Speakers

JUDITH DANIELS, PhD, APRN, FNP- PHP
Assistant Professor (University of Kentucky College of Nursing) | Clinical Practitioner, Polk Dalton Internal Medicine/Pediatrics Clinic (Lexington, Kentucky)

Dr. Daniels earned an MSN/FNP at Michigan State University and a PhD in nursing at the University of Kentucky. Throughout her nursing career, Dr. Daniels gained a wide array of clinical experiences. She is dual board certified in Family and Pediatrics and maintains an active practice at the Polk Dalton Internal Medicine/Pediatrics Clinic in Lexington, Kentucky.

Her background in graduate education began at the University of Kentucky. She then joined Frontier Nursing University as an associate professor where she learned a great deal about web-based graduate education. Research interests center on weight management, motivational interventions, and teaching learning issues.

PAMELA HAGAN, MSN, RN
APRN/ Education & Practice Consultant, Kentucky Board of Nursing (Louisville, Kentucky)

Prior to joining the Board staff, Pam held a variety of positions including clinical nurse specialist in ambulatory and inpatient oncology, and practiced in clinical areas of acute care, home health, hospice, and palliative care as well as in nursing education. She has held executive and management roles in community hospitals, hospice care, Veterans Affairs, and university medical center settings and previously served as a member of the Kentucky Board of Nursing. Pam was the Executive Director of Kentucky Nurses Association and then moved to the Washington, DC area where she was the Chief Programs Officer at the American Nurses Association for 9-10 years.

She is a graduate of the University of Kentucky College of Nursing with a Master of Science in Nursing.

HENDRÉE JONES, PhD
Professor, Obstetrics and Gynecology, University of North Carolina School of Medicine
Adjunct Professor, Psychology and Neuroscience, Johns Hopkins University School of Medicine
Executive Director, Healthy Start (Chapel Hill, North Carolina)

Dr. Jones holds a PhD in Psychology from Virginia Commonwealth University Medical College of Virginia.

Dr. Jones is an internationally recognized expert in the development and examination of both behavioral and pharmacologic treatments for pregnant women and their children in risky life situations.

She has received continuous funding from the United States National Institutes of Health since 1994 and has published over 165 publications, two books on treating substance use disorders (one for pregnant and parenting women and the other for a more general population of patients), and several book and textbook chapters.

Dr. Jones is a consultant for the United Nations and the World Health Organization. She leads or is involved in projects in Afghanistan, the Southern Cone of South America, the Republic of Georgia, South Africa, and the United States focusing on improving the lives of children, women, and families.

MORGAN RANSDELL, JD
Prosecuting Attorney, Kentucky Board of Nursing (Frankfort, Kentucky)

Before joining the Kentucky Board of Nursing, Mr. Ransdell worked for twelve years as an attorney with the Kentucky Commission on Human Rights and for five years as an attorney with the Kentucky Attorney General's Office.

Mr. Ransdell holds a Juris Doctorate degree from the Vanderbilt University School of Law and a Bachelor’s Degree from the University of Kentucky.

During his twenty-two years of legal practice, Mr. Ransdell has concentrated in the areas of employment law and professional licensure litigation.

ASHEL KRUETZKAMP, MSN, RN
Nurse Manager, Saint Elizabeth Healthcare (Covington, Kentucky)

Ashel has a positive, can do attitude and a visible impact on her department; setting an example for her staff, peers, and others throughout the organization and community. This, along with her recent strides in the fight against Northern Kentucky’s heroin problem, has led to Ashel’s Healthcare Heroes nomination by the Cincinnati Business Courier under the manager category.

Ashel has inspired her staff to achieve a new level of care in the Emergency Department (ED). Using, for instance, her leadership and talents to get her staff involved in a research project with the Ft. Thomas Intensive Care Unit that involves nurse-to-nurse hand off communication to improve the continuity of care.

She is committed to her department and it shows in the way she rolls up her sleeves and works along-side them as needed – whether day, night or weekend.

As a passionate leader, Ashel also sees opportunities in the community, and as such, has stepped up in identifying the area’s heroin problem. Before the heroin issue became known on both sides of the river, Ashel noticed a problem and began collecting data in 2010, clearly showing the heroin problem exists and is growing.

She was one of the first healthcare professionals to join a community task force on heroin and now focuses on increasing awareness and educating nurses and the community on the impact of heroin.

In her own words, “Heroin is hugely impacting our community and we need to make the community aware, provide community education and resources. Facts are an important part of the awareness. Many in the community don’t even realize that heroin is as big as it is because it has not impacted them yet. And I hope for many it never does.”

Since identifying the problem back in 2010, Ashel has been a frequent source for media interviews as well as industry and community panels to discuss this growing problem in both Northern Kentucky and Hamilton County.
